

RT500RF

The RT500RF is ideal for use in situations where it is impractical or inconvenient to run wires between the thermostat location and other controls within the heating system. The RF version has all the benefits of the RT500 with added simplicity of no wires and no messy changes to the decor.

Features

- 5/2 or 7 day programming flexibility
- Frequency 868 MHz (30 metre range)
- Desk stand
